Medicines:

- If you have palpitations during a long time or panic attacks take 1 mg Lorazepam occasionally (prescribed by your health care doctor). This is the only chemical for which i did not find a natural replacement yet. Maybe Kava Root is a natural replacement but i never tried it yet. But it is important to use the drug if you want to stop palpitations. Nb : beware of the addiction that this kind of medication can generate.
- Some natural alternatives exist like Ginseng, Rhodiola, Ashwagandha, **Valerian root, Escholtzia, Passionflower** (Passiflore), **Hawthorn** (Aubépine) but they are less potent. These herbs are also good to remove stress and anxiety. It is worth giving it a try.

In bold are those that we should take every day. Then you can add some more during the day (celery, tomatoes, and fish for example)

En gras sont ceux que vous devriez prendre chaque jour.
